Alvaro Grover Choque Gomez

Potosi, Bolivia · linkedin.com/in/agrovercgomez · logangch8v@gmail.com · github.com/logang-bot · +591 68381496

Software engineer with 4+ years of experience spanning mobile, web, and backend development. Currently focused on native and cross-platform mobile development (Android & iOS) using Kotlin, Swift, Jetpack Compose, SwiftUI, and .NET MAUI, with a foundation in full-stack web development through the MERN stack. Graduated with academic honors in Systems Engineering and committed to continuous growth across the full software development spectrum.

EDUCATION

Universidad Autónoma de Chile — **Chile**
Graduate Diploma in Software Architecture — *Apr 2025 - Aug 2025*
390 hours · Grade: 6.9/7.0 · Remote

Universidad Autónoma Tomás Frías — **Potosi, Bolivia**
Systems Engineering — *Mar 2017 - May 2022*
Honors: Graduation Modality for Academic Excellence

PROFESSIONAL EXPERIENCE

Jalasoft — **Cochabamba, Bolivia**
Staff Engineer — *Nov 2025 - Now · Remote*

- Led large-scale refactors of legacy modules exceeding 1,800 lines, restructuring them under Clean Architecture, MVVM, and Observer/State patterns.
- Resolved complex AutoMapper bugs and extended the offline network request queue to support multipart request handling.
- Fixed critical device permission bugs using thread-safe concurrency primitives (Volatile, Interlocked) across Android and iOS.
- Increased ownership over product decisions by actively contributing to ticket acceptance criteria definition and collaborating directly with the Product Owner.

Jalasoft — **Cochabamba, Bolivia**
Junior Core Engineer — *Nov 2022 - Nov 2025 · Remote*

- Developed cross-platform mobile features for Android and iOS using Kotlin, Swift, Jetpack Compose, SwiftUI, and .NET MAUI/Xamarin across multiple production products.
- Engineered native library bindings for .NET, integrating Lottie, Transcoder, and Flurry Analytics SDKs from scratch.
- Built a custom video compression tool for Android leveraging Transcode and FFmpeg libraries.
- Implemented interactive map features including custom routes, markers, and info cards using the Maps API.
- Migrated legacy Java codebases to Kotlin and improved fragment-based navigation to the Navigation Component.
- Architected and delivered scalable features following MVVM pattern; experienced with MVC and Clean Architecture.
- Collaborated in agile SCRUM teams, contributing to ceremonies, sprint planning, and iterative delivery.

Universidad Autónoma Tomas Frias **Potosi, Bolivia**
Teaching Assistant of Full Stack development *Feb 2020– Nov 2020*

- Instructed students in MERN stack (MongoDB, Express, React, Node.js) and React Native development.
- Covered JavaScript, TypeScript, JSX, HTML/CSS, and cloud deployment via MongoDB Atlas and Vercel.

SKILLS

Languages & Frameworks
Kotlin · Swift · C# · JavaScript · TypeScript · React · React Native · Node.js · Express

Mobile Development
Jetpack Compose · SwiftUI · UIKit · XML/Views · .NET MAUI · Xamarin Android · Xamarin iOS

Architecture & Patterns
MVVM · MVC · Clean Architecture · MVP · VIPER

Databases & Backend
Firebase · Room · Core Data · MongoDB · RESTful APIs · Retrofit · HttpClient

Tools & Practices
Git · CI/CD · Scrum · Unit Testing · FFmpeg

Spoken Languages
Spanish (Native) · English (Advanced) · Portuguese (Intermediate)
